

# Application of the Month

## “Concrete admixtures”

Turbine meters and electronic totalizers heighten concrete admixing.

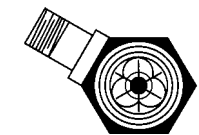

### TYPICAL CONFIGURATION:

### How it works:

Product is metered through the PRECISION TURBINE FLOWMETER, a signal is generated and registers on the T650N totalizer. Data received from the totalizer is transmitted from the SP825 handheld IR Data cube and downloaded into the SP824 printer, where a ticket is generated.
