“Emergency Diesel Generator”

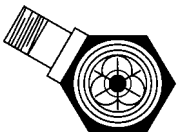

Turbine flowmeter system aids in operation of emergency generator.

TYPICAL CONFIGURATION:

Sponsler Company supplied the Beau Rivage, Casino and Resort in Biloxi Mississippi with a 2” 304 Stainless Steel PRECISION TURBINE FLOWMETER with NPT end fittings and a Battery Powered IT275N Rate Indicator/ Totalizer for their backup emergency diesel generator located by the Marine Dock.

How it works: Diesel fuel is pumped through the turbine flowmeter to accurately measure the amount of fuel required to operate the emergency generator. The IT275N displays the rate of the fuel.
